PROFESSIONAL SUMMARY

Motivated Information & Communication Technology (ICT) Diploma student at Marwadi University with hands-on expertise in Python development, data analytics, and machine learning. Experienced in building end-to-end data pipelines, interactive dashboards, and AI-powered automation tools. Passionate about solving real-world problems through data-driven solutions.

EDUCATION

Diploma in Information & Communication Technology

Focus: Advanced Python, ML, Data Science, DBMS, Data Structures, Backend Operations
Marwadi University, Rajkot

3rd Year (Ongoing)

Expected: May 2027

CGPA: 7.62

CORE SKILLS

- **Python Development:** Application Building, Automation Scripts, API Integration, Flask/Django (Basics), Git/GitHub
- **Data Analytics & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Tableau/Power BI (Basics), Data Cleaning
- **Technical Proficiency:** R Programming, SQL, System Design, Technical Writing
- **Systems & Hardware:** OS Optimization (Windows/macOS/Linux), Hardware Troubleshooting, Virtualization (VMware/VirtualBox)
- **Professional:** Analytical Problem Solving, Client Communication, Time Management

KEY PROJECTS & ACHIEVEMENTS

📊 Customer Churn Prediction Model

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Developed an end-to-end machine learning pipeline to identify at-risk customers and analyze primary drivers behind customer attrition.
- Conducted exploratory data analysis (EDA), treated data imbalances, engineered predictive features, and evaluated classification algorithms to maximize precision and recall metrics.

📊 AQI Analysis & Prediction Dashboard

Tech Stack: Python, Pandas, Plotly, Scikit-learn, Streamlit

- Built an interactive Streamlit dashboard analyzing over 435,000 India air quality records from 1987 to the present.
- Implemented a Linear Regression model ($R^2: 0.96$) for live, real-time AQI prediction based on dynamic pollutant inputs.

🤖 AI-Based PPT Generator

Tech Stack: Python, python-pptx, Ollama, API Integration

- Built an end-to-end presentation generator using a local LLM (Ollama/Gemma4) and the Unsplash API.
- Generates 75+ slide decks automatically from a topic prompt with AI content, imagery, and custom layouts.

⚙️ Technical Short-Form Projects

- **Python Automation & Visualization:** Engineered custom automation scripts to increase workflow efficiency and developed visualizations using Matplotlib/Seaborn to interpret academic datasets.
- **System Architecture & R Analysis:** Configured a high-availability laptop remote server environment and built R-scripts to perform regression modeling for mathematical assignments.

WORK & INTERNSHIP EXPERIENCE

📊 Data Analysis Intern — BrainyBeam Infotech

Remote

- Executed exploratory data analysis (EDA), data cleaning pipelines, and basic statistical modeling using Python ecosystem tools.
- Interpreted datasets to generate visual progress matrices and actionable metrics.

🔧 Technical Support Specialist — Volunteer

Campus

- Assisting peers with OS installations, software troubleshooting, hardware configurations, and optimizing performance/security.

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Gujarati | **Availability:** Remote / WFH & Part-Time only
