PROFESSIONAL SUMMARY

3rd-year ICT Diploma student who has shipped three deployed data and ML projects — including a production AQI prediction dashboard analyzing 435,000+ records at 0.96 R² accuracy — while completing a remote data analytics internship and delivering freelance Python/data work for outside clients.

EDUCATION

Diploma in Information & Communication Technology

Marwadi University, Rajkot — Focus: Advanced Python, ML, Data Science, DBMS, Data Structures, Backend Operations
CGPA: 7.62

3rd Year (Ongoing)

Expected: May 2027

CORE SKILLS

Python Development: Application Building, Automation Scripts, API Integration, Flask/Django (Basics), Git/GitHub

Data Analytics & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Tableau/Power BI (Basics), Data Cleaning

Technical Proficiency: R Programming, SQL, System Design, Technical Writing

Systems & Hardware: OS Optimization (Windows/macOS/Linux), Hardware Troubleshooting, Virtualization (VMware/VirtualBox)

Freelance Delivery: Fiverr/Upwork Gig Scoping, Requirement Translation, Async Client Updates

KEY PROJECTS & ACHIEVEMENTS

Customer Churn Prediction Model

Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn

- Built an end-to-end machine learning pipeline that identified at-risk customers and isolated the primary drivers behind customer attrition.
- Ran exploratory data analysis, corrected class imbalance, engineered predictive features, and benchmarked classification algorithms to maximize precision and recall.

AQI Analysis & Prediction Dashboard

Tech Stack: Python, Pandas, Plotly, Scikit-learn, Streamlit

- Built an interactive Streamlit dashboard analyzing over 435,000 India air quality records spanning 1987 to the present.
- Deployed a Linear Regression model (R²: 0.96) that delivers live AQI predictions from dynamic pollutant inputs.

AI-Based PPT Generator

Tech Stack: Python, python-pptx, Ollama, API Integration

- Built an end-to-end presentation generator powered by a local LLM (Ollama/Gemma4) and the Unsplash API.
- Generated 75+ slide decks automatically from a single topic prompt, combining AI-written content, sourced imagery, and custom layouts.

Technical Short-Form Projects

- Python Automation & Visualization:** Built Python scripts to automate recurring data-cleaning tasks and developed Matplotlib/Seaborn visualizations to interpret academic datasets.
- System Architecture & R Analysis:** Set up a remote-access server on a personal laptop for continuous script execution, and built R scripts to run regression modeling for mathematical assignments.

WORK & INTERNSHIP EXPERIENCE

Data Analysis Intern — BrainyBeam Infotech

Remote

- Ran exploratory data analysis, built data-cleaning pipelines, and applied statistical modeling using the Python ecosystem.
- Interpreted datasets to produce visual progress matrices and actionable metrics for stakeholder review.

Technical Support Specialist — Volunteer

Campus

- Resolved OS installation issues, software conflicts, and hardware configuration problems for fellow students on campus.

ADDITIONAL INFORMATION

Languages: English, Hindi, Gujarati | Availability: Remote / WFH & Part-Time only
